PROJECTS

Hotel Booking Platform Prototype

- Developed a comprehensive prototype for a hotel booking platform using Figma.
- Offered diverse destination options, various hostel choices, and competitive pricing to attract a wide range of users.
- Implemented intuitive login and signup pages to enhance user experience and streamline booking.
- Created wireframes, user flows, and high-fidelity interactive prototypes. Ensured an intuitive and user-friendly interface.

Tense Detection Tool

- The UI features a dedicated login/signup page, along with sections for Features and About Us to provide detailed tool insights.
- It enables comprehensive sentence analysis, checking tense, spelling, verbs, punctuation, and structure.
- The design is fully responsive, ensuring an optimal user experience across various devices and platforms.
